

VinPol™ PEMB50Y

Polyethylene Based Masterbatch – 50% Loaded Black

Carrier Resin: PE

Loading: 50%

VINPOL PEMB50Y is a polyethylene based, highly loaded carbon black masterbatch for use in polyolefins. This product is a general-purpose black masterbatch designed for extrusion and injection molding processing. Pre-testing is recommended.

Resin Property	Typical Value	Units
Pellet Size	50 +/- 10	ppg
Form Supplied	Pellets	
Packaging	Gaylord, bag	
*Recommended Let Down	2 – 5	Wt %

**The optimum additive loading in the final part depends on the specific processing conditions and expected part environment. The processor will need to confirm the optimum loading level for each particular end use application.*
